

Description

Ruilon combines its patented GDT and a Metal Oxide Varistor (MOV) to create a new and innovative KOV[®] Series Composite Surge Protective Unit. By combining the best features of both MOV and GDT technologies, the KOV[®] Series achieves high performance as a long life protector with low capacitance and, most importantly, very low leakage. The KOV[®] Series is ideally suited for any number of AC and DC power applications where a high level of performance is required over time.

Features

- I Hybrid design
- I Low leakage
- I Bidirectional protection
- I Low capacitance
- I RoHS and REACH compliant

Circuit Diagram

Applications

AC Line Protection

- I White goods
- I Power line communications
- I Smoke alarm systems
- I High value consumer goods
- I UL 1449 SPD 5th edition

DC Line Protection

- I Solar inverters
- I Power supplies
- I Distribution systems

Part Number Code

1) Front Level Protection (V_{fp}) defined as measured with 10 % of peak current in accordance with IEC 61051-1.

Agency Approvals

Icon	Description
ROSH	Compliance with 2011/65/EU
HF	Compliance with IEC61249-2-21:2003
	Mean lead free
	Compliance with UL1449 Certificated E508408

Soldering Profile

Users should ensure that they do not exceed the scope of IPC/JEDEC J-STD-020 (Pb-Free) during solder assembly.

Profile Feature	Profile Limits
Preheat temperature min. (T_{smin})	150°C
Preheat temperature max. (T_{smax})	200°C
Ramp time ($T_{smax} - T_{smin}$)	60 – 120 seconds
Ramp-up rate (T_L to T_p)	3 °C / second max.
Liquidus temperature (T_L)	217°C
Time maintained above (T_L)	60 – 150 seconds
Peak package body temperature	260°C
Time within 5 °C of peak temperature (T_p)	30 seconds max.
Ramp-down rate (T_p to T_L)	6 °C / second max.
Time from 25 °C to peak temperature	8 minutes max.
